

Bikram Mondal

Full Stack Web Developer

bikrammondalwork05@gmail.com ♦ +91 7439589152 ♦ <https://bikram-dot-dev.vercel.app>

Education

Heritage Institute of Technology, Kolkata
B.Tech in Computer Science Engineering(AIML)

Aug 2024 - Aug 2028

Experience

Full-Stack Developer Intern

Digital Dominators IN — Kolkata, India

Jul 2025 - Present

- Developed responsive web applications using React.js, TypeScript, Tailwind CSS, and Node.js, delivering scalable and user-friendly interfaces.
- Implemented secure authentication and role-based authorization, enabling protected routes and efficient admin access management.
- Built reusable UI components for events, teams, FAQs, and testimonials, ensuring responsive and consistent user experiences.
- Automated email workflows using Node.js and Nodemailer for account verification, notifications, and community communications.
- Integrated REST APIs, optimized application performance, and collaborated using Git/GitHub to deliver production-ready features.

Backend Developer Intern

Bunchhh — Kolkata, India

Jul 2025 - Dec 2025

- Developed scalable backend services using Node.js, Express.js, and Prisma ORM, building secure and maintainable RESTful APIs.
- Implemented stateless JWT authentication and role-based authorization, securing protected endpoints and administrator access.
- Integrated backend APIs with React frontend and ML pipelines, enabling seamless data exchange across services.
- Designed and optimized database operations using Prisma ORM with NeonDB (PostgreSQL), improving query efficiency and data management.
- Built reusable Express middlewares for authentication, validation, error handling, and request processing, enhancing code quality and maintainability.

Skills

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Prisma, MongoDB, NeonDB

Tools: Git, GitHub, Postman, Docker

Projects

LiveNotes – Real-Time Note Sharing App ([View Live](#))

Project: <https://github.com/BikramMondal5/LiveNotes>

- Built LiveNotes, a full-stack real-time collaboration platform using Next.js, Node.js, Express.js, MongoDB, and Socket.IO, enabling synchronized note editing and collaborative workspaces.
- Implemented WebSocket-based real-time communication, room-based access control, live canvas synchronization, PDF sharing, and persistent note storage for seamless multi-user collaboration.
- Integrated multimodal AI assistance and CLI-based note management, enabling contextual screenshot analysis, intelligent query handling, and terminal-to-web synchronization for enhanced productivity.

PostGenie.AI – Serverless AI-Powered Multi-Model Platform for Social Media Content Creation ([View Live](#))

Project: <https://github.com/BikramMondal5/PostGenie-AI>

- Built PostGenie AI, a serverless AI-powered platform using React, TypeScript, Node.js, and AWS, generating platform-optimized social media content with Amazon Bedrock foundation models.
- Implemented scalable serverless architecture with AWS Lambda, API Gateway, DynamoDB, EventBridge, and S3, enabling secure authentication, scheduled publishing, and high-performance API workflows.
- Integrated multi-model AI pipelines and social media APIs, supporting content generation, editing, scheduling, and direct publishing while maintaining consistent brand voice across platforms.

PersonaForge – AI Agent Orchestration Platform ([View Live](#))

Project: <https://github.com/BikramMondal5/PersonaForge>

- Built PersonaForge, a full-stack AI agent orchestration platform using Next.js, Node.js, Firebase, and Google ADK, enabling creation of persona-driven AI agents with memory, tool calling, and workflow automation.
- Implemented multi-agent orchestration with LangGraph, MCP servers, and Gemini API, integrating web search, file intelligence, voice AI, and external APIs for intelligent task execution.
- Developed secure OAuth authentication and AI safety guardrails, incorporating Google/GitHub OAuth, persistent memory, prompt validation, and scalable cloud deployment using Firebase and Google Cloud Run.

Achievement

- Secured **1st Position** in the GitHub Track at **Bot-A-Thon 2026**, an international-level 48-hour hackathon, as a **Solo Builder**. [Certificate Link](#) 19th May, 2026
- Secured **1st Position** in the **AIML Track** at **Hack-N-Verse** as a **Solo Builder**, recognized for innovation, problem-solving, and impactful AI/ML development. [Certificate Link](#) 26th Mar, 2026
- Won the **GenAI 101 with Pieces Challenge** as a **Solo Builder** for building 'Dev Diary', an AI-powered developer journaling platform. [Certificate Link](#) 21st Jul 2024
- Secured **1st Runner-Up** in the **CodeCanvas Challenge** by **GDG On Campus IIIT Kalyani** as a **Solo Builder**. [Certificate Link](#) 24th Feb, 2026
- Among the **Top 6 teams** in the "AI for Media, Content & Digital Experiences" track at the national-level **AI for Bharat Hackathon'26** by **AWS** as the **Solo Builder**. [Certificate Link](#) 3rd June, 2026
- **Finalist** at **East India Blockchain Summit 2.0**, IIT KGP, where we developed 'NanoBonds', a blockchain-based **DeFi platform** for **fractionalized government bonds**. [Certificate Link](#) 7th Feb 2026
- **Finalist** at **Smart Bengal Hackathon**, RCCIT, where I developed a **decentralized marketplace** for buying and selling educational materials. [Certificate Link](#) 3rd May 2025
